IMPORTANT PROPANE SAFETY INFORMATION

Propane & Oil Since 1932

Dear Valued Customer,

Eastern takes pride in safely providing you with the propane you need for your home or business. Propane is a safe, reliable, and clean energy source. It is important that you are aware of basic safety requirements for its storage and use. Please familiarize yourself with the pamphlet available here - **Important Propane Safety Information**.

Before any excavations are done, contact Dig Safe at (888) 344-7233 or 811. Then call us at (800) 523-5237 before digging or excavating near an underground propane line or other utility.

Understanding how to properly use and store propane, as well as how to detect warning signs of a gas leak, can significantly reduce the risk of a propane-related hazard in your home or business. It is our intent that providing you with this information will help to keep you and our fuel delivery drivers safe. If you have any questions regarding the propane safety material, please call us and we will be happy to assist you.

Thank you for reviewing the safety information and for being an Eastern customer.

Sincerely,
Eastern Propane & Oil
